

The cheat sheet from BOLL. Here you can find all important FortiGate CLI commands for the operation and troubleshooting of FortiGates with FortiOS 6.4.

## → System

| General System Commands   |                                |
|---------------------------|--------------------------------|
| get system status         | General system information     |
| exec tac report           | Generates report for support   |
| tree                      | Lists all commands             |
| <command> ? / tab         | Use ? or tab in CLI for help   |
| <command>   grep [filter] | Grep command to filter outputs |
| diag debug cli 8          | Shows webGUI changes in CLI    |

| Process Information           |  |
|-------------------------------|--|
| get system performance status | General performance infos                      |
| diag sys top [sec] [number]   | Process list<br>Sort with P (CPU) / M (Memory) |
| diag debug crashlog read      | Crash log                                      |

## → Traffic Processing

| General Debugging                   |  |
|-------------------------------------|--|
| diag debug appl [appl] [level]      | Realtime debugger for different applications                 |
| diag test appl [appl] [test_level]  | Monitor proxy operations                                     |
| diag debug console timestamp enable | Enables timestamp in console                                 |
| diag debug [enable/disable]         | Enable/disable output for "diag debug" or "diag ip" commands |
| diag debug reset                    | Reset debug levels   |

| Firewall Session Troubleshooting         |   |
|--|---|
| diag sys session filter                  | Filter for session list                               |
| diag sys session list (expect)           | Lists all (or expected) sessions                      |
| diag sys session clear                   | Clear all / filtered sessions                         |
| diag sys session stat                    | Session and memory statistics, drops, clashes         |
| diag firewall iprope clear 100004 [<id>] | Resets counter for all or specific firewall policy id |

| Packet Sniffer   |   |
|--|---|
| diag sniffer packet [any/<f>] ['filter'] [verbose] [count] [timestamp] | Packet sniffer. Use filters!<br>Verbose levels 1-6 for different output |

| Flow Trace  |  |
|---|--|
| diag debug flow filter [filter]   | Use filters to narrow down trace results |
| diag debug flow show iprop en<br>diag debug flow show fun en<br>diag debug flow trace start [count] | Debug command for traffic flow           |

## → Network

| Interface Information      |                                 |
|----------------------------|---------------------------------|
| diag ip address list       | List of IPs on FGT interfaces   |
| diag firewall ipolist list | List of IPs on VIP and IP-Pools |

| Network Troubleshooting          |                       |
|----------------------------------|-----------------------|
| get hardware nic [port]          | Interface Information |
| diag ip arp list                 | ARP table             |
| exec clear system arp table      | Clears ARP table      |
| exec ping x.x.x.x                | Ping utility          |
| exec ping-options [option]       |                       |
| exec traceroute x.x.x.x          | Traceroute utility    |
| exec traceroute-options [option] |                       |
| exec telnet x.x.x.x [port]       | Telnet utility        |

| Integrated Iperf Utility                         |  |
|--|--|
| diag traffictest server-intf                     |  |
| diag traffictest client-intf                     | Iperf test directly run from FortiGate |
| diag traffictest port [port]                     |  |
| diag traffictest run -c [public_iperf_server_ip] |  |

| General Routing Troubleshooting               |   |
|---|---|
| get router info routing-table all             | Routing table   |
| get router info routing-table details x.x.x.x | Shows Routing decision for specified Destination-IP     |
| get router info routing-table database        | Routing table with inactive routes                      |
| get router info kernel                        | Forwarding information base                             |
| diag firewall proute list                     | List of policy-based routes                             |
| diag ip rtcache list                          | List of route cache                                     |
| get router info protocols                     | Overview of dynamic routing protocol configuration      |
| exec router restart                           | Restart of routing process                              |
| diag sys link-monitor status/interface/launch | Shows link monitor status / per interface / for WAN LLB |

## High Availability

| HA General   |  |
|--|--|
| exec ha manage [index] [admin]                             | Jump to cluster member   |
| get sys ha status  | Information about HA status  |
| diag sys ha history read                                   | Details about past HA events   |
| diag sys ha dump-by vcluster                               | Show cluster member uptime   |
| diag sys ha reset-uptime                                   | Reset cluster member uptime  |
| diag debug appl hataalk -1<br>diag debug appl hasync -1    | Debugging of HA-Talk/-Sync protocol  |
| exec ha ignore-hardware-revision status / enable / disable | Set ignore status for different HW revisions   |
| exec ha failover status                                    | View failover status   |
| exec ha failover set <cluster_id>                          | Device stays in failover state regardless of condition. Triggers a HA failover on master device. |

| Cluster Synchronisation          |   |
|----------------------------------|---|
| diag sys ha checksum cluster     | Show config checksums of all cluster member |
| diag sys ha checksum show [vdom] | Detailed config checksum for a VDOM         |
| diag sys ha checksum recalculate | Recalculation of config checksums           |

## → UTM Services

### FortiGuard Distribution Network (FDN)

|                         |  |
|-------------------------|--|
| update.fortiguard.net   | URLs to access the FortiGuard Distribution Network (FDN) |
| service.fortiguard.net  |  |
| securefw.fortiguard.net |  |

### Signature Update

|                           |  |
|---------------------------|--|
| diag autoupdate status    | Summary of Fortiguard settings                             |
| diag autoupdate versions  | Detailed versions of packages                              |
| diag debug appl update -1 | Realtime debugging for updating process with manual update |
| exec update-now           |  |

### Antivirus

|                                   |                                |
|-----------------------------------|--------------------------------|
| diag antivirus database-info      | Antivirus database information |
| diagnose antivirus test "command" | Different tests for AV engine  |

### IPS

|                              |                                  |
|------------------------------|----------------------------------|
| diag ips anomaly list        | Lists statistics of DoS-Policies |
| diag ips packet status       | IPS packet statistics            |
| diag test appl ipsmonitor 2  | Enable / disable IPS engine      |
| diag test appl ipsmonitor 5  | Toggle bypass status             |
| diag test appl ipsmonitor 99 | Restart all IPS processes        |

### Webfilter

|   |  |
|---|--|
| diag debug rating                         | Webfilter / AntiSpam Server information        |
| diag webfilter fortiguard statistics list | Statistics of FortiGuard requests              |
| diag webfilter fortiguard cache dump      | List content of webfilter cache                |
| diag test appl urlfilter 1                | Lists webfilter test commands                  |
| diag debug urlfilter src-addr x.x.x.x     | Filter and Realtime Debugging for Webfiltering |
| diag debug appl urlfilter -1              |  |

### Emailfilter

|  |                                    |
|--|------------------------------------|
| diag emailfilter fortishield servers   | Displays FortiShield server list   |
| diag emailfilter fortishield stat list | Statistics of FortiShield requests |

## → Firewall Policy

### Device Detection

|                               |                               |
|-------------------------------|-------------------------------|
| exec update-src-vis           | Update device detection DB    |
| diag user device list / clear | Show / clear detected devices |

### Internet Service Database (ISDB)

|   |   |
|---|---|
| diag internet-service info vdom proto port ip     | Lists summary/details for specific Internet Service   |
| diag internet-service info ...                    | Reverse ISDB lookup for specific IP, protocol or port |
| diag internet-service match <vdom> <ip> <netmask> | Reverse ISDB lookup for specific IP                   |

### FQDN

|                                  |                 |
|----------------------------------|-----------------|
| diag test application dnsproxy 6 | Dump FQDN cache |
| diagnose firewall fqdn list      | List all FQDN   |

### Logging

|               |                              |
|---------------|------------------------------|
| diag log test | Generates dummy log messages |
| exec log list | List log file information    |

### Traffic Shaper

|  |   |
|--|---|
| diag firewall shaper traffic-shaper list / stats | Traffic shaper list / statistics        |
| diag firewall shaper per-ip-shaper list / stats  | Per IP traffic shaper list / statistics |

### SIP

|                                     |                             |
|-------------------------------------|-----------------------------|
| diag sys sip status                 | SIP session helper status   |
| diag sys sip-proxy stats list       | SIP ALG session status      |
| diag sys sip-proxy calls list/clear | List/Clear active SIP calls |
| diag debug appl sip -1              | Realtime Debugger for SIP   |

## Authentication

### Authentication

|   |   |
|---|---|
| diag firewall auth filter ...                                   | Filter for authentication list              |
| diag firewall auth list   | List of authenticated user                  |
| diag test authserver [auth-protocol] [server] [user] [password] | Authentication test                         |
| diag debug appl auth -1   | Debugging of local authentication protocol  |
| diag debug appl fnbamd -1                                       | Debugging of remote authentication protocol |

### FortiToken

|  |   |
|--|---|
| diag fortitoken info                                   | Current FortiToken status                                     |
| exec fortitoken activate [Forti-TokenSN]               | Manual FortiToken activation                                  |
| diag deb appl forticldd 255                            | FortiToken activation debugging                               |
| diag fortitoken debug enable                           | FortiToken debugging  |
| exec fortitoken-mobile import 0000-0000-0000-0000-0000 | Recover Trial FortiToken (delete existing Trial Token before) |

### FSSO

|                                      |                                      |
|--------------------------------------|--------------------------------------|
| diag debug authd fssso filter        | Filter for FSSO user list            |
| diag debug authd fssso list          | List of FSSO authenticated user      |
| diag debug authd fssso server-status | List of FSSO collector agents        |
| diag debug fssso-polling ...         | Info for clientless polling FSSO     |
| diag debug appl fssod -1             | Debugging of clientless polling FSSO |

### Explicit Proxy

|                          |   |
|--------------------------|---|
| diag wad user list/clear | List / clear of explicit proxy user       |
| diag wad filter ...      | Filtering / listing of web proxy sessions |
| diag wad session list    |   |
| diag test appl wad 104   | DNS statistics for explicit proxy         |
| diag test appl wad 110   | Current proxy user                        |
| diag test appl wad 112   | Enables output of subsequent commands     |
| diag test appl wad 2200  | Maximum number of users                   |

## → VPN

| IPsec VPN                    |                                   |
|------------------------------|-----------------------------------|
| diag debug appl ike 63       | Debugging of IKE negotiation      |
| diag vpn ike log filter      | Filter for IKE negotiation output |
| diag vpn ike gateway list    | Phase 1 state                     |
| diag vpn ike gateway flush   | Delete Phase 1                    |
| diag vpn tunnel list         | Phase 2 state                     |
| diag vpn tunnel flush        | Delete Phase 2                    |
| get vpn ike gateway          | Detailed gateway information      |
| get vpn ipsec tunnel details | Detailed tunnel information       |
| get vpn ipsec state tunnel   | Detailed tunnel statistics        |
| diag vpn ipsec status        | Shows IPSEC crypto status         |

## → SD-WAN & Security Fabric

| SD-WAN   |                                      |
|--|--------------------------------------|
| diag sys virtual-wan-link member                   | Provide Interface details            |
| diag sys virtual-wan-link health-check <name>      | State of SLAs                        |
| diag sys virtual-wan-link service <rule-id>        | SD-WAN-Rule-State                    |
| diag sys virtual-wan-link intf-sla-log <intf-name> | Link Traffic History                 |
| diag sys virtual-wan-link sla-log <sla> <link_id>  | SLA-Log on specific interface        |
| diag test appl lnkmtl 1/2/3                        | Statistics of link-monitor           |
| diag debug appl link-mon -1                        | Real-time debugger of link-monitor   |
| Security Fabric                                    |                                      |
| diag sys csf upstream / downstream                 | List of up/downstream devices        |
| diag sys csf neighbor list                         | MAC/IP list of connected FGT devices |
| diag test appl csfd 1                              | Display security fabric statistics   |
| diag debug appl csfd -1                            | Real-time debugger                   |
| diag automation test <stitch_name>                 | Test stitches in the CLI             |

## → BGP, OSPF

| BGP  |  |
|--|--|
| get router info bgp summary                      | BGP summary of BGP status                      |
| get router info bgp neighbors                    | Information on BGP neighbors                   |
| diag ip router bgp all enable                    | Real-time debugging for BGP protocol           |
| diag ip router bgp level info                    |  |
| exec router clear bgp all                        | Restart of BGP session                         |
| OSPF   |  |
| get router info ospf status                      | OSPF status                                    |
| get router info ospf interface                   | Information on OSPF interfaces                 |
| get router info ospf neighbor                    | Information on OSPF neighbors                  |
| get router info ospf database brief / router lsa | Summary / Details of all LSDB entries          |
| get router info ospf database self-originate     | Information on LSAs originating from FortiGate |
| diag ip router ospf all enable                   | Real-time debugging of OSPF protocol           |
| diag ip router ospf level info                   |  |
| exec router clear ospf process                   | Restart of OSPF session                        |

## Wireless, Switch, FortiExtender ←

| Access Point (CLI commands on Access Point) |  |
|---|--|
| cfg -a ADDR_MODE=DHCPSTATIC                 | Change IP from DHCP to static on FortiAP     |
| cfg -a AP_IPADDR="xxx.xxx.xxx.xx"           | Set static IP on FortiAP                     |
| cfg -a AP_NET-MASK="255.255.255.0"          | Set subnet mask on FortiAP                   |
| cfg -a IPGW="yyy.yyy.yyy.yyy"               | Set gateway on FortiAP                       |
| cfg -a AC_IPADDR_1="zzz.zzz.zzz.zzz"        | Specify IP of Wireless Controller on FortiAP |
| cfg -s / -c                                 | List / Save config on FortiAP                |
| cfg -x                                      | Reset to factory default                     |

| Wireless Controller  |                                    |
|--|------------------------------------|
| exec wireless-controller restart-acd   | Restart wireless controller daemon |
| exec wireless-controller reset-wtp   | Restart FortiAPs                   |
| diag wireless-controller wlac -c ap-rogue  | List rogue APs                     |
| exec wireless-controller spectral-scan <wtp-id> <radio-id> <on   off> <duration> <channel> <report-interval> | Start or stop spectrum analysis    |
| diag wireless-controller wlac -c rf-sa <wtp-id> <radio-id> <channel>   | Show spectrum analysis results     |
| get wireless-controller spectral-info <wtp-id> <radio-id>  |                                    |

| Switch Controller                               |  |
|---|--|
| diag switch-controller switch-info mac-table    | Managed FortiSwitch MAC address list             |
| diag switch-controller switch-info port-stats   | Managed FortiSwitch port statistics              |
| diag switch-controller switch-info trunk        | Trunk information                                |
| diag switch-controller switch-info mclag        | Dumps MCLAG related information from FortiSwitch |
| exec switch-controller get-conn-status          | Get FortiSwitch connection status                |
| exec switch-controller diagnose-connection      | Get FortiSwitch connection diagnostics           |
| diag switch-controller nac-device known / clear | Show / Clear NAC devices                         |

| FortiExtender                              |  |
|--|--|
| get extender sys-info [FXT SN]             | Check the FortiExtender status                                   |
| get extender modem-status [FXT SN]         | Get the detailed modem status of the FortiExtender               |
| diag debug appl extender -1                | FortiExtender debugging, collect information for about 5 minutes |
| exec extender reset-fortiextender          | Restart managed FortiExtender                                    |
| exec extender restart-fortiextender-daemon | Restart for AC daemon  |

| Modem                    |                             |
|--------------------------|-----------------------------|
| diag sys modem detect    | Detect attached modem       |
| diag debug appl modemd 3 | Debugger for modem commands |

## → System

| Default Device Information                   |  |
|--|--|
| admin / no password                          | Default login                                    |
| 192.168.1.99                                 | Default IP on port1, internal or management port |
| 9600/8-N-1<br>hardware flow control disabled | Default serial console settings                  |

| Factory Reset              |   |
|----------------------------|---|
| exec factoryreset          | Reset whole configuration                                 |
| exec factoryreset-shutdown | Reset config and shutdown                                 |
| exec factoryreset2         | Reset with retaining admin, interfaces and static routing |

| Firmware Update                  |  |
|----------------------------------|--|
| diag debug config-error-log read | Show config errors after firmware upgrades |

| VDOMs  |  |
|--|--|
| sudo global/ vdom-name<br>diag / exec / show / get | Sudo-command to access global / VDOM settings directly |

| Transparent Mode             |                  |
|------------------------------|------------------|
| diag netlink brctl name host | Bridge MAC table |

| Workspace Mode                                       |  |
|--|--|
| exec config-transaction<br>start/abort/commit        | Start/abort/commit of Workspace Mode       |
| diag sys config-transaction status                   | State of Workspace Mode (enabled/disabled) |
| diag sys config-transaction show<br>txn-info         | Shows all active Workspace Modes           |
| diag sys config-transaction show<br>txn-cli-commands | Pending CLI commands of Workspace Mode     |

## → Hardware

| Hardware Information                           |   |
|--|---|
| diag hardware sysinfo cpu                      | CPU information   |
| diag hardware sysinfo conserve                 | Conserve Mode details.<br>"Mem": Memory / "FD": File descriptor |
| diag hardware sysinfo memory                   | Memory size, utilization  |
| diag hardware test suite all                   | Hardware test (available only on newer models)                  |
| get hardware nic [port]                        | Physical interface information                                  |
| get system interface<br>physical / transceiver | Signal information for Copper or SFP/SFP+ interfaces            |

| Disk Operation                |   |
|-------------------------------|---|
| diag hardware deviceinfo disk | List disks with partitions                                      |
| exec disk list                | List the disks and partitions                                   |
| exec disk scan [ref_int]      | Run a disk check operation                                      |
| exec disk format [ref_int]    | Format the specified partitions or disks and reboots the system |
| exec formatlogdisk            | Formatting the log disk, reboot included                        |

| Hardware Acceleration         |  |
|-------------------------------|--|
| set auto-asic-offload disable | Disable session offloading per firewall policy |
| set npu-offload disable       | Disable VPN offloading per Phase 1             |
